1948 Wholesale PLANTING LIST

It Pays To Plant The Best

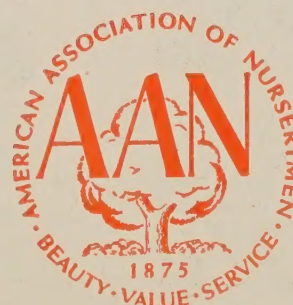

For a number of years our specialists have worked on the development of a more perfectly balanced seedling tree — that is, a tree with healthier leaves, stronger stems, and, above all, a LARGER and STURDIER ROOT SYSTEM.

As a result of our efforts, we proudly offer to our customers a stronger, healthier tree with a root system that permits trees to be transplanted with a smaller percentage of loss.

Left to right — 3-year Special Colorado Blue Spruce; 3-year Canadian Hemlock; 2-year Scotch Pine; 5-year American Arborvitae; 4-year Norway Spruce.

Musser Forests Trees that Grow

Grown from Certified Seed

Mugho Pine

Dwarf, spreading, slow growing ornamental. Hardy everywhere except in wet soil. Requires sunlight.

Spreading Yew

The characteristic spreading growth of this well known ornamental lends itself superbly to development of masses of shiny dark green foliage. Beautiful as individual specimens. Grows in sun or shade.

Austrian Pine

Stands out on account of its heavy, bushy form. An excellent tree for windbreaks, screens, and for single specimens. It is a rapid growing species, but prefers good soil. One of the most beautiful Christmas trees.

Two Year Seedlings above show the startling results of Scientific Culture. Trees marked A were given full benefit of proper growing conditions. Trees marked B were raised in beds which did not receive proper care. Note sturdy root structure of "A" (Musser Quality) trees.

Whether you plant one
acre in trees . . . or one
thousand acres,

IT PAYS

To Plant

THE BEST

If planted under the proper conditions, 85% to 95% of Musser Forests Tree Stock will grow to maturity and return an excellent profit on your investment in seedling trees, in labor, and in land. . . .

NORWAY and WHITE SPRUCE

These are two of the most widely used of the cultivated evergreens. Although slower growing than the Pines, they are excellent for windbreaks, hedges, shelters, and home ornamental use. They are also unexcelled for Christmas Trees. Norway has short, shiny, dark green needles, thick foliage, and strong branches. White Spruce, although very similar to Norway, has lighter, bluish-green needles. Both are very valuable timber species, and plantations may be thinned for pulp-wood production. They grow best on moist, well-drained porous soils, and from sea-level to elevations of 5000 feet. Many Spruce trees have been planted in this country exclusively for Christmas trees, and with little care they develop into fine specimens which command premium prices on all markets.

Douglas Fir

A fairly long needle fir, grayish-green in color. Highly ornamental. A good soil is desirable, but is not required, for this species. It will do well in open sunlight or partial shade. A popular Christmas tree.

Scotch Pine

Rapid growing; light gray-green foliage. Will grow in poor soil and under adverse conditions. This species, first to be planted extensively for Christmas trees, is well established in markets. Also used for windbreaks, shelters or developed into beautiful specimen trees for the home.

Musser Forests

Special Offers

COLORADO BLUE SPRUCE

The King of Ornamentals

Colorado Blue Spruce has long been regarded as one of the finest of ornamental trees. It is sturdy, symmetrical and compact in form, ranging in color from slightly blue-green to marvelous blue. It thrives in moist rich soil and prefers sunlight. Growth is slow. The blueness of these trees may be intensified by carefully working a thin layer of well rotted cow manure into the surface of the soil around the tree, and watering frequently. Care should be exercised in the use of this fertilizer; burning may result from over-feeding.

While this species is primarily used in ornamental plantings, it offers the highest quality in a Christmas tree. Thus it is often advisable to include a quantity of Blue Spruce in a plantation for special premium trees. Shearing is recommended, following a season of unusually rapid growth.

Special No. 1

3-YEAR-OLD

50 Blue Spruce \$3

Healthy, vigorous stock, 3" to 6" tall.
Sent postpaid at planting time.

Special No. 2

5-YEAR-OLD

10 Blue Spruce \$3

Very superior stock. Well branched. 5-year-old Transplants, 6" to 12" tall.

Special No. 3 10 Norway Spruce \$2

Hardy, 4-year-old TRANSPLANTS. Well branched, 8 to 16 inches tall. Norway has short, shiny, dark green needles, thick foliage and strong branches. A widely used ornamental. For individual specimens or hedges. Trees will be sent postpaid at planting time.

Special No. 4

WHITE BIRCH

20 FOR \$3

Twenty 12 to 24 inch seedlings sent postpaid at planting time. Very hardy in all climates and conditions. Bark turns creamy white at about 5 feet (3 to 4 years). To get graceful clump effect, plant several seedlings together.

Shipped Postpaid at Planting Time

Special No. 5

Sugar MAPLE TREES

Hardy, sugar Maple shade trees, 6 to 12 inches. Grows well in average soil. A beautiful, easily grown tree for street or ornamental purposes. Sent postpaid at planting time.

Special No. 6

15 American Arborvitae \$3

For HEDGE WORK or SPECIMEN TREES

5-Year-Old Transplants. Healthy Trees, 6 to 12 inches high. Sent postpaid at planting time.

American Arborvitae, sometimes known as White Cedar, is one of the most popular choices for home planting. Foliage is dark green. Since trees may be pruned back to any height, this plant is adaptable to many uses. Excellent for hedges, windbreaks, mixed plantings, specimens. Prefers full sun.

Ground Cover

Pachysandra Terminalis (Spurge)

A dense, lustrous green, trailing vine type of ground cover. It thrives under evergreens or anywhere; almost evergreen in itself. If planted 8 to 10 inches apart it will give a pleasing effect immediately and in two years time will form a solid ground cover. Prefers shade; any soil; water liberally. VERY HARDY. Grows 6 to 8 inches tall. Fine for terraces or any place where grass is not successful.

100 Pachysandra \$15

Fine, strong plants, 3 to 4 inches tall, shipped POSTPAID at planting time.

1000 Pachysandra, \$95.00

Shipped COLLECT at planting time

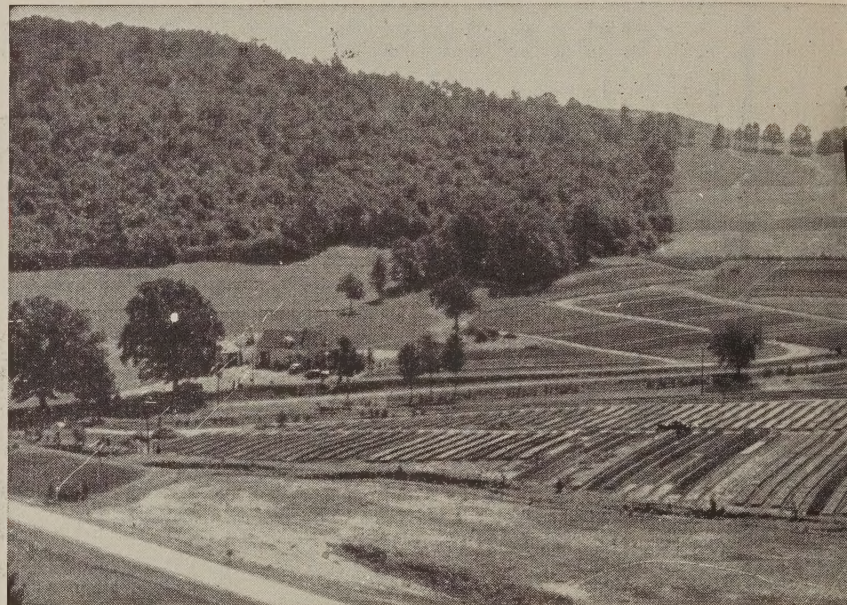

From an Ohio Customer

"About five years ago I sent for one of your evergreen seedling offers. The trees that I received all survived transplanting. Of course, they aren't forest giants. One wouldn't expect them to be in that short time. Nonetheless, they have all turned out to be quite lovely little specimen plants—the Blue Spruce, especially. These latter have a good blue cast—something that probably stamps me as being lucky for you just can't predict with any great degree of accuracy in plants that small, which will be really blue and which will be the ever lovely green. . . ."

If ALL of your order is purchased at the 100 rate and paid for in full prior to shipment, it will be shipped prepaid anywhere in the United States. Except certain items marked (*) which will be shipped Express Collect. **Our liability ceases when trees are delivered to carrier.**

EXPLANATION OF LIST

The figures 2-0, 2-1, 2-2-1 indicate the number of years the trees have been in the seedbeds and the transplant beds. The first figure indicates the number of years in the seedbed. A dash followed by a figure indicates a transplanting. The second figure is the number of years in the first transplant bed, the third figure the number of years in the second transplant bed. Thus the sum of all figures is the total age of the tree. For instance, (2-2) indicates a tree that was transplanted when it was a seedling, and has grown two years in a transplant bed.

ORNAMENTALS

Balled and Burlaped Ornamentals — sheared stock in lots of 5 or more, \$3.00 each; in lots of 25 or more, \$2.50 each; 100 or more, \$2.00 each — F.O.B. Indiana, Pennsylvania. No. C. O. D.

Musser Quality BLUEBERRIES

ONE PLANTING WILL PRODUCE LARGE, DELICIOUS BERRIES FOR A LIFETIME

Grow Blueberries for Pleasure and Profit

Bearing Age Shrubs Will Produce This Year

This Fine Musser Blueberry Shrub, two years out of the Nursery, is heavy with a profitable yield. Note the interesting and decorative natural shape of this average specimen.

Musser Quality Blueberries are the most popular for Home Garden growing. The singularly attractive bushes (see photo left) add beauty to any landscape, winter or summer. An excellent plant for garden boundaries, or planted in clumps. Our selection of three choice varieties insures proper cross-pollination, resulting in large crops.

The large, delicious berries (see photo at lower left, showing actual size of Musser Cultivated Blueberries) are a treat for all the family — and six bushels will supply many more than your own requirements. And, with Blueberries of this high quality retailing at from 35 cents to 75 cents a pint, the heavily bearing bushes can be a source of considerable profit.

Any type of acid soil, which is reasonably moist, but well-drained, will favor the finest development of these shrubs. If your soil is sweet, it can be readily conditioned by thoroughly mixing peat moss, partially rotted leaves, pine needles, or rotted sawdust with the soil before planting. Complete planting instructions are sent with each shipment.

We are offering two (2) each of the strongest bearing, named varieties; you are assured of a continuous crop throughout the summer. Bearing-age plants will produce fruit this year.

Blueberry Special No. 7

6 healthy, vigorous, sturdy Musser Quality Blueberries, 2 year plants, 6 to 12 inches.

Sent POSTPAID for \$6.95

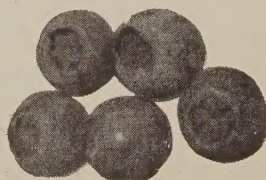

Blueberry Bearing Age Special No. 8

6 Blueberries, same as above, but 3-year stock, 18 to 24 inches, which is of bearing age — These plants will begin producing fruit THIS YEAR

Sent POSTPAID for \$10.95

Cultivated Blueberries (shown above) and Wild Blueberries (below) are here compared in ACTUAL SIZE. The careful culture of Musser Quality Blueberries has brought about this startling improvement. No one can resist the delicious flavor of Cultivated Blueberries.

Gladiolus

Highest Quality Bulbs Only

One of the most popular of all garden flowers. Only first quality bulbs, selected for beauty of form and color, are included in this list. They are not to be confused with tiny corms or bulblets so promiscuously advertised. Plant outdoors as soon as ground warms in spring. Place about 6 inches apart, and 3 inches deep in well-cultivated enriched soil. Water during extremely dry weather. Bulbs should be lifted in fall before heavy frost.

14 to 18 florettes to each stem

No. 1 Large Fancy Bulbs

\$3.00 for 25, \$4.75 for 50; \$8.50 per 100

Shipped Postpaid

Your choice of the following named varieties:

Early Dawn — Pink
 Flaming Sword — Flaming Red
 Gold Dust — Deep Yellow
 Maid of Orleans — Pure White
 Picardy — Apricot-Pink

We cannot ship less than 25 of one variety.

REGAL LILY

Lilium Regale

Gorgeous, bell-shaped, white, sweet scented flowers with a touch of gold in the throat and a shading of lilac-pink on the outside. Blooms in clusters at the top of stem during July. One of the most beautiful and easiest grown of all lilies, the individual blooms of which measure about 6 in. in length and 4½ to 5 in. across — 3 to 5 feet high. Do not remove the roots on these bulbs. Plant 8 in. deep and leave alone forever after.

No. 1 Best Quality Bulbs. Postpaid

6-7 in. in circumference

. . . \$2.75 for 10, \$13.00 for 50, \$25.00 for 100

8-9 in. in circumference

. . . \$5.00 for 10, \$25.00 for 50, \$45.00 for 100

Special No. 9 Asparagus

You May Reap Profits For As Long As 20 Years.

We are particularly proud of the fine 2-year, selected Musser Delicious Asparagus Roots offered here. Based on the rust-proof Mary Washington strain, our plants will produce stalks big enough for cutting the first year after planting, and with proper care, will produce a continually finer table delicacy for many years thereafter. Distinguished by extra heavy crowns, long, fat roots, and a clear green color; rust-resistant, and very strong growers. If you have available a bed of deep, rich soil, you can't go wrong on Musser Asparagus.

50 Strong 2-yr. Roots, \$3.75

Not less than 50 sold at this price. Shipped postpaid.

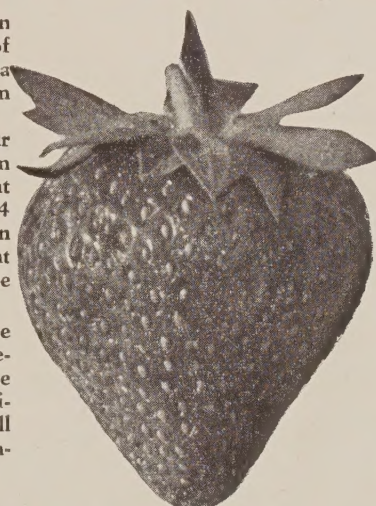

Grow STRAWBERRIES

For Home Use — For Profitable Marketing

Strawberries can be grown in practically every section of the country. They have a place in each garden, from the smallest to the largest.

The plants included in our offer have been selected from the strongest, disease-resistant strains. Our assortment of 4 varieties will produce an abundance of large, succulent berries during the whole summer.

Musser Strawberries have no exceptional soil requirements — plants will produce well under average conditions. You will have a full crop next spring and summer from these plants.

Special No. 10 (Postpaid)

100 Early (2 var.) 50 Mid-Season 50 Everbearing

This is an ideally balanced collection, and enough to plant 12 25-foot rows. Complete planting instructions sent with each order.

200 Strawberry Plants, \$6.95

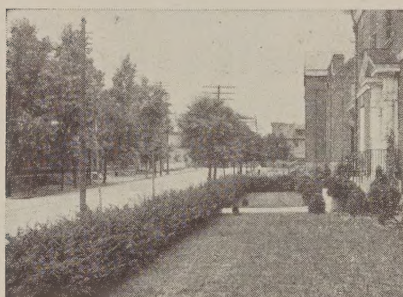

Special No. 11 (Postpaid)

50 Early (2 var.) 25 Mid-Season 25 Everbearing
 100 Strawberry Plants, as listed \$3.95

Every Home Needs a **HEDGE**

Add beauty to your home with an Ornamental Hedge ★ Afford your property the protection of a living evergreen fence ★ Evergreen hedges are versatile; they may be kept at any desired height or width, almost indefinitely ★ Equally beautiful when they grow into their natural form.

Barberry Hedge

A sturdy thorned shrub, well known, and widely used for hedges. Bears bright red berries in fall, which cling on through the winter, adding beauty to utility. Barberry is very hardy.

Sheared Hemlock Hedge

The Hemlock hedges shown in photo at right were planted with transplant stock, in double rows 12 inches apart, the trees being 8 to 10 inches apart in each row. By annual shearing this hedge has been kept to a size of 1½ feet for the past 7 years, and can be kept the same height for a number of years to come.

Note trees to the right of the doorway. The low plant is a Spreading Japanese Yew. Immediately back of, and to the right, an Upright Yew is shown. The tall tree nearest the doorway is an American Arborvitae.

Windbreaks

The fine Scotch Pine Windbreak, shown at left, could have been developed from any of our Pines. As well as making a beautiful addition to any farm or country home, a Windbreak serves the very practical purpose of protecting against damage and loss to property by the elements. Any species of Pine is especially suitable for development of a Windbreak, due to its rapid growth.

◀ Scotch Pine Windbreak

Spacing for Hedges or Windbreaks

LOW Clipped Hedge	8 to 10 inches apart
(For wider hedge, use double rows, 12 inches apart)	
MEDIUM Hedge, 3 to 4 feet	1 to 2 feet apart
TALL Hedge	3 to 5 feet apart

Spacing of Forest Trees

Where thinning is to be done at a comparatively young age (4 to 5 years) as with a Christmas Tree plantation, spacing is 3' by 3' for Spruce or 5' by 5' for Pines. With a forest plantation when no thinning is intended for 20 to 25 years, 6' by 6' or 8' by 8' is recommended.

Number of trees required per acre for different spacings:			
3 x 3 — 4,840	4 x 4 — 2,722	5 x 5 — 1,742	6 x 6 — 1,210

Experienced crews can plant an average of 1000 trees per man per day.
